## DETAILED ACTION

### QUAYLE

This application is in condition for allowance except for the following formal matters:

#### *Claim Objections*

Claims 16 and 22 are objected to because of the following informalities:

Claim 16, line 8, "a positive voltage" should correctly be -- a negative voltage --.

Note, "a first transistor (Q1)" of the claim is responsive to "a positive voltage (Vp)".

Thus, "a second transistor (Q2)" should responsive to "a negative voltage (Vn)".

Claim 22, line 2, "(configured" should correctly be -- configured --.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

#### *Allowable Subject Matter*

Claims 1-22 are allowed.

Claims 1-8 call for, among others, a bias current circuit responsive to positive and negative input voltages of the RF amplifier and generate a differential current, wherein the differential current is clipped and filtered as claimed.

Claims 9-22 call for, among others, a bias current circuit comprising quiescent current supplies current to a differential power sensor means, which senses the input power of the RF amplifier and produces a bias current higher than the quiescent current.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
